

Medical AI Report - Brain Tumor Classification

Report ID: c60b3aa8-d10d-4c34-88a7-fdbdacc2149

Date: 2025-12-07 07:02 UTC

Prediction

Label: Glioma Confidence: 100.00%

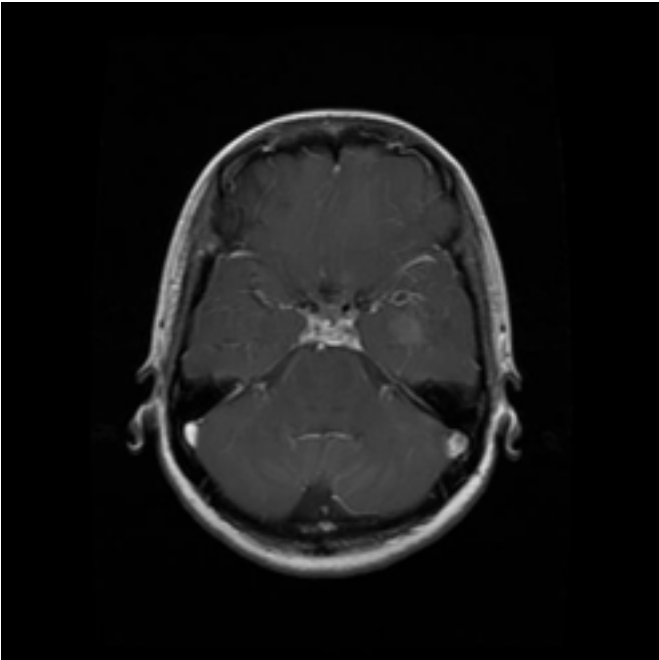

Description: A tumor that starts in the support cells of the brain (called glial cells). Its seriousness depends on how aggressive the tumor cells are (their grade) and where the tumor is located.

Cause: Often due to random changes in cells' DNA. Sometimes previous head radiation can increase risk, but often the exact cause is unknown.

Symptoms

- Headaches
- Seizures
- Vision problems
- Balance problems
- Speech or memory issues

Patient MRI

Reference: Normal brain (no tumor)
